

# Boundless and Mapbox Partner to Deliver Global Content

[Boundless](#) has announced a strategic partnership with [Mapbox](#), the location data and mapping platform for developers. Through this partnership, Boundless customers can now access high-quality Mapbox basemaps within the [Boundless Connect](#) ecosystem.

[Boundless Desktop](#) users can easily access this content through the [Boundless Connect](#) plugin. Mapbox content is also accessible through Boundless [Suite](#) and [Exchange](#) subscriptions. These basemaps include:

- [Mapbox Streets](#): A comprehensive, general-purpose basemap used for styling transit networks
- [Mapbox Outdoors](#): A basemap with curated tilesets and specialized styling tailored for

adventurous use cases such as hiking or biking

- [Mapbox Light & Dark](#): A subtle, full-featured basemap that provides geographic context while highlighting data
- [Mapbox Satellite](#): A full global basemap, perfect as a blank canvas or overlay
- [Mapbox Satellite Streets](#): Combines Mapbox Satellite with vector data from Mapbox Streets, providing a comprehensive set of road, label and POI information; bringing greater clarity and context to the crisp detail in high-resolution satellite imagery
- Additional premium services for routing, geocoding and more will be available in the near future
