

# Dronecloud Beta Testers Required for Powerful Drone Management Software

Dronecloud has developed a full end-to-end solution to manage the complex workflows involved in running internal and external drone teams, from client job commissioning and compliance through to flight planning and data delivery; and is the first drone management platform to harmonise customer engagement with industry-leading drone compliance.

Dronecloud is an easier way to manage and grow drone operations whilst engaging with clients and stakeholders. The solution is expected to launch towards the end of Q1 2019. In the meantime, drone operations of all sizes are welcome to register and help refine what is set to become the 'go-to platform for drone operations' globally. The public beta is now open on a 1st come, 1st served basis. To get involved, go to <https://dronecloud.io/find-out-more> or

email [beta@dronecloud.io](mailto:beta@dronecloud.io).

Designed for all sizes, types and complexity of drone operations, Dronecloud simplifies operations that are often suffering from disjointed and inefficient workflows such as:

- Multiple subscriptions for different parts of the drone workflow with you and your client's sensitive data flowing from point to point across the internet – who knows what is stored where... and by whom...
- A mix of cloud-based and local systems supported by spreadsheets and emails. Avoiding misunderstandings and misalignment with clients is a constant battle
- An inability for clients to track progress of multiple jobs in real-time.

Key features of Dronecloud include:

- Customer Job request and quoting – Engage customers, nail down requirements
- Job Management for operators and clients – Keep track of your workload
- Manage your fleet, teams and log flights – effortless admin
- Manage Airspace and risk to the highest industry standards – stay compliant
- Data hosting and visualisation - Share and collaborate securely
- Data sensitivity and security built into the core – complete confidence for you and your customers
- Building an ecosystem prepared for the future - BVLOS, real-time insurance, access to large supplier frameworks

Dronecloud are offering free benefits for joining their beta programme, to get involved head to: <https://dronecloud.io/find-out-more> or email [beta@dronecloud.io](mailto:beta@dronecloud.io). Dronecloud will also be announcing some exciting partnerships soon. To get in touch with a general enquiry please email [hello@dronecloud.io](mailto:hello@dronecloud.io).
