

# Getmapping and Esri Announce Partnership

Geospatial solutions company Getmapping has entered into a partnership with Esri, the global leader in spatial analytics technology. Getmapping is a leading provider of aerial photography, Lidar, digital mapping and web-based services across Europe and Africa. Working with carefully selected strategic partners, Getmapping delivers innovative solutions required to meet complex geospatial challenges.

Esri provides the world's most powerful mapping and analytics software. Its commitment to helping solve some of the world's most difficult problems aligns with Getmapping's own core purpose of creating solutions to the challenges facing our planet, according to the company.

The collaboration will integrate Getmapping's high-resolution 2D and 3D datasets with Esri's GIS software platform. This powerful combination will help customers take advantage of their investment in both GIS and geospatial data.

Dave Horner, CEO of [Getmapping](#), commented: "Esri have recognised Getmapping's professionalism, quality of service and ability to ensure customer success by welcoming them to the Esri partner network. We look forward to collaborating with Esri to give users more efficient and effective access to our diverse geospatial data."

James Harvey, partner and alliances manager, Esri UK, added: "Esri are excited to welcome Getmapping into our partner network. Integrating Getmapping's datasets and capabilities with the Esri geospatial cloud will provide customers the opportunity to gain business advantage through a greater understanding of where, why and when things happen. We look forward to working together to ensure the future success of this partnership."
