

# Gold Sponsor 1Spatial Present at AGI GeoCom

1Spatial, the global spatial software firm which manages the world's largest spatial data, is a Gold Sponsor at GeoCom, the annual flagship event organised by AGI to bring together the main GIS themes of 2015.

The 1Spatial team will be exhibiting throughout the event and presenting on the theme of Big Data on day one at midday. In addition, they will be presenting under the Innovation stream on day two of the conference at 2pm.

Jo Shannon, 1Spatial's National Mapping and Land Administration Account Manager, will lead the big data presentation, exploring how automated GIS products and processes can help to manage big data and take advantage of the information it provides.

The next day, Bob Chell, Head of Consultancy, will present 1Spatial's latest solution; 1Integrate for ArcGIS, which provides automated data validation and management for the ArcGIS platform. Bob will explain how 1Integrate helps improve data, so that business processes are fit for purpose in decision making, customer engagement and regulatory compliance.

GeoCom: Resilient Futures runs from 23-25 November at Chesford Grange Hotel, near Warwick, UK.
