

# Hewlett Packard Chooses XYZ Maps

XYZ Maps has been selected out of hundreds of companies across the world by Hewlett Packard to provide maps for their plotters.

Dr Tim Rideout from [XYZ Maps](#) commented: "It is a great reflection on both XYZ Maps and Scottish cartography that out of all the hundreds of map companies in the World, HP should have come to us."

Hewlett Packard has selected a range of XYZ World, Continental and City maps to use as demonstration and sample files at Print and Design Shows all round the World. So next time you are you are looking for a large plotter at a Print Show you might well find an XYZ World Political Wall Map, an XYZ Africa Wall Map or an XYZ London City Map rolling out the front.

Dr Rideout added: "HP selected the XYZ maps because of the complexity of the graphics and the colourful content, both of which showcase the abilities of their plotters. HP may also include the files as samples when clients purchase a plotter."
