

# HxGN SmartNet Releases App for Instant Updates

HxGN SmartNet has expanded with the release of an app that now the latest status information directly to your smart phone so you are always aware and up-to-date of the environment around you.

Many professions benefit from [HxGN SmartNet](#) to efficiently complete their daily tasks, including surveying, construction, agriculture, logistics, automotive and many more. The app provides an information channel that is independent of the GNSS device being used. So, whether you are a surveyor, engineer, farmer or construction machine operator, it keeps you informed of all aspects of the HxGN SmartNet service that is relevant to your location.

Information is available at your fingertips to quickly access information about your HxGN SmartNet subscription, the status of the RTK network and receive status updates in the field.

The HxGN SmartNet App delivers:

- Live status map, giving a real time view of the status of all reference stations in our network
- Subscription renewal date
- For those with Time Limited Subscriptions, information on the amount of service time you have consumed and the time you have remaining
- Push notifications directly from our HxGN SmartNet operators for up-to-date status information
- The ability to create support tickets so our operators can help you in the field

Download the HxGN SmartNet app on [iTunes](#) or [Google Play](#)
