Land. Sea. Air.

Innovative solutions for all of your positioning needs

UniStrong

United.
Stronger Together.

Your partner for navigating a complex global network

UniStrong is a global company that designs and manufactures high-precision products and services for the geospatial marketplace.

Along with its brands Hemisphere GNSS and Stonex, UniStrong offers innovative products and services for OEM/ODM (Original Equipment/Design Manufacturer), machine control & guidance, survey & mapping, GIS (Geographic Information Systems), L-band correction services, marine, field mobile worker, monitoring, and unmanned systems markets.

UniStrong continues to invest in expanding its Centers of Excellence across the globe. This includes China, USA, Italy, Canada, and Singapore, with expansions planned for Japan, Brazil, and Russia.

UniStrong empowers our partners by working with them to meet their unique requirements for their customers.

Global Presence. Localized Service.

Innovative products and services changing the geospatial landscape

Founded in 1994, UniStrong has more than 1,300 employees worldwide and sells through a global distribution network. UniStrong is headquartered in Beijing, China with head offices located in Scottsdale, AZ, USA (Hemisphere GNSS) and Lissone, MB, Italy (Stonex).

UniStrong continues to expand its Centers of Excellence and its distribution footprint globally, facilitating local support virtually anywhere in the world.

UniStrong

By expanding its strategic mergers and acquisitions, UniStrong continues to lead in the global geospatial marketplace.

Hemisphere GNSS designs and manufactures innovative GNSS products and services for use in OEM/ODM, machine control & guidance, survey & mapping, L-band correction services, marine, monitoring, and unmanned systems. Hemisphere is based in Scottsdale, AZ, USA, with offices located around the globe.

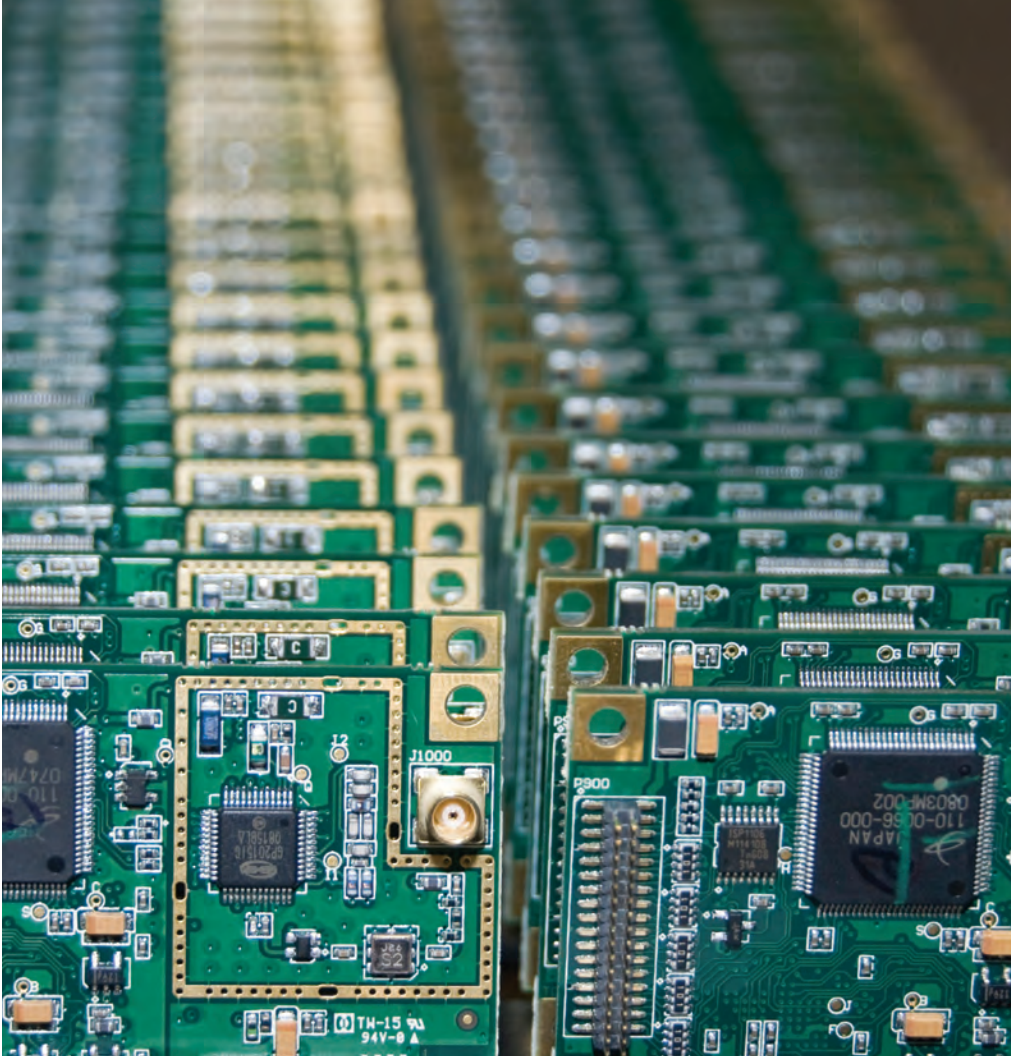

Stonex is a multinational company, based in Italy (Lissone, MB), that designs and manufactures high-precision surveying instruments for civil engineering, topography, GIS & mapping, 3D imaging, security, transportation, and mining.

OEM/ODM and Finished Products

- > UniStrong partners with our OEM/ODM by leveraging our core hardware and software design services, and finished products to create customized, unique solutions for our customers.

Machine Control & Guidance

- > Construction
- > Mining
- > Agriculture
- > Specialty Machines
- > Driving School

Survey & Mapping, GIS

UniStrong

Hemisphere

STONEX

- > High-Precision Survey
Antennas and Receivers
- > Rugged Handhelds and
Tablets
- > 3D Scanning
- > Application Software

L-Band Correction Services

Hemisphere

- > **Atlas® GNSS Global
Correction Service**
 - > Precise Positioning
 - > Available via L-band
Satellites and IP

Marine

UniStrong
Hemisphere

- > Professional
- > Commercial
- > Recreational

Field Mobile Worker

UniStrong

- > Government Agencies
- > Utilities

Monitoring

- > Infrastructure
- > Windmills
- > Antenna Alignment
- > Deformation Monitoring

Unmanned Systems

- > OEM Modules for Aerial, Terrestrial, and Marine Drones
 - > Precision Navigation
 - > Precise Location
